

# Igor Ermakov

## Senior Web Developer

Gomel, Belarus / Esentepe, Northern Cyprus

**SKYPE** i.ermakov    **PHONE** +375 44 7350540 / +905338293138

**EMAIL:** [i.ermakov7@gmail.com](mailto:i.ermakov7@gmail.com)

## Experience

### **IMAGEBROKER, GERMANY, 2010 - ..., REMOTE DEVELOPER**

I was one of 2 developers for a german photo agency which have a lot of photographers and distributors.

List of used features: PHP5, MySQL5, JavaScript, Bootstrap, Google Material Design Lite, jQuery with multiple plugins, jQuery UI, Apache SOLR search engine, ElasticSearch. AWS: Beanstalk, S3, EC2, ElasticSearch, etc...

NGINX web-server, Zend Framework, Doctrine, memcache, Mail sending, Mass FTP uploads, XML-RPC, REST, PDF generations, image processing (resizing, cropping, write metadata, etc), a lot of CLI tools and scripts, and so on...

**Editorial microservice:** PHP7, MySQL5, Laravel, Vue.js, Angular.js.

### **FINALVIEW, US, 2008-2010, REMOTE DEVELOPER**

Biggest projects:

- igottalist.com ZendFramework, Prototype JS, Octazen API, Shopping.com API, Youtube API

- frastic.com - Music portal. ZendFramework, Doctrine, jQuery, jQuery UI, Twitter API, MySpace API, Facebook API

### **MOVEYOURWEB.NET, 2007-2008**

Biggest projects:

- adblade.com - an AD server. SQL stored procedures, high load optimizations, Facebook API, GEO functions, mem-cache.

- DotProject - many small/middle tasks for the internal project management system.

### **ENVISIONEXT INC, 2006-2007**

- PHPCOLLAB - many small/middle tasks for the internal project management system.

## Education

Belarussian State University of Transport. Microprocessor information-control systems. 2002-2007

## Skills

PHP5, MySQL, HTML, CSS, JavaScript, XML, XSLT, UML, SVN, GIT, Apache Solr, Apache Lucene, Nginx, Apache, lighthttpd, memcache, linux scripts, REST, XML-RPC. ZendFramework, Doctrine ORM, idiorm (DB ORM), Smarty, Pear, Prototype JS, DoJo, jQuery, Twitter Bootstrap, Slim (microframework), CLI image/music/video processing (crop, convert, resize, stream, ...), Linux shell and so on...

I prefer using "test driven development" (TDD) for my working tasks.

Development Environment: PHPStorm on Mac OS X (Ex. linux and windows user)
